

Picture shown may not reflect actual configuration

Features

Proven Energy Yield

- 20.5% to 21.3% efficiency
- -0/+5W positive power tolerance
- Bifaciality – 70±5%

Excellent Performance in Low Irradiance

- Outstanding power output in low irradiance conditions such as dawn, dust, and cloudy days.
- Reduced resistive loss with lower operating current.
- Higher energy yield with lower operating temperature.
- Reduced hot spot risk with optimized electrical design.

Anti-PID

- Anti-PID (Potential-induced degradation) techniques for processing solar cells and encapsulation of modules applied.

Adaptability to Harsh Environments

- Excellent anti-salt mist and anti-ammonia capability; adaptable to harsh environments such as seaside and farms.

Robust Frame

- Robust module construction enables installed module to withstand 5400 Pa front side static loading and 25 mm hail impact at 23 m/s.

PVC525-545 MB03HE Monocrystalline Bifacial dual glass Half-cut Photovoltaic Module

The monocrystalline bifacial dual glass half-cut PV (photovoltaic) modules feature high efficiency low light induced degradation (LID) Mono PERC (passivated emitter rear cell) technology and provide excellent front side performance under low temperature or low light environment at high levels of reliability. The module rear side provides additional energy power output.

Built with Higher Quality Material

- Cat® PV modules are highly durable, providing higher reliability and more confidence in long term performance.
- The bill of materials (BOM) for modules manufactured for Caterpillar have been qualified by independent labs through extended durability tests that are significantly more stringent than normal IEC/UL certification requirements as shown below:

DURABILITY TEST CYCLE				
Accelerated Tests	Competitor products*	Outside US§	US	Cat Advantage
Salt mist	Not required	Pass IEC test	Pass IEC test	Validated for use in harsh environment
Ammonia	Not required	Pass IEC test	Pass IEC test	
Dust and Sand	Not required	Pass IEC test	Pass IEC test	
Damp Heat	1000 hrs.	1000 hrs.	2000 hrs.	2x testing hrs.^
Thermal Cycling	200 cycles	200 cycles	600 cycles	3x testing cycles^
PID (85°C/85RH)	96 hrs.	96 hrs.	192 hrs.	2x testing hrs.^
Mechanical load**	Static	Static	Dynamic + Thermal Cycle + Humidity Freeze	Much less cell breakage and power loss^

* Certified to minimum IEC/UL standards

** Dynamic Mechanical Load Test: The only mechanical test in IEC 61215 is a static mechanical load test that is performed after the accelerated stress tests.

^ US.

§ US product is available outside US on request.

Module Warranty

- 10-year warranty for materials and processing
- 30-year warranty for linear power output. Produces more than 98% power in the first year, then declining by 0.45% per year, ending at 84.95% power after 30 years.

Worldwide Product Support

- Cat® dealers have over 1,800 dealer branch stores operating in over 200 countries.
- Your local Cat dealer provides extensive pre-sale and post-sale support, including design consultation, service contracts, and all maintenance agreement.

Standards

- IEC 61215
- IEC 61730 Class C according to UL790
- UL 61730, Type 3 fire rating
- IEC 61701, Salt mist corrosion test
- IEC 62716, Ammonia corrosion test
- IEC 60068, Dust and Sand test
- ISO 9001:2008: ISO Quality Management System
- ISO 14001:2004: ISO Environment Management System
- TS62941: Guideline for module design qualification and type approval
- OHSAS 18001: 2007 Occupational Health and Safety

Certifications (pending)

- Available listing: TUV SUD, CSA, CE
